

WW1 WING RIB FROM CRASHED AIRCRAFT

Wing rib of unknown aircraft type or nationality. Length 47cm x 10.5cm. Each side of the rib has the following inscription:

*'CRASHED FEB 20TH 1919 AT LATRACEY FRANCE RIB OF WING ONE KILLED
FELL 1500 FT'*

Rib almost certainly from an allied aircraft based in France in the immediate aftermath of WW1. Its not clear where Latracey is in France but its probably a misspelling of a by and allied serviceman.
